EDUCATION

Data Scientist and Data Analytics - CoderHouse
2023

Gastronomy and haute cuisine - IGA
2017

Nutrition - UCSE
Present

TECHNICAL SKILLS

Programming
Python • SQL

Data Analysis
Pandas • NumPy • Statistical Analysis • Data Cleaning

Data Visualization
Tableau • Power BI

Machine Learning
Scikit-Learn • Classification Regression • Model Evaluation Feature Engineering

Artificial Intelligence
Prompt Engineering
LangGraph • LangChain
Generative AI • REST APIs
MCP Servers

LANGUAGES

- Spanish
- English

ABOUT ME

Data Analyst with a multidisciplinary background in Data Science, Business Analytics, and Business Management. Experienced in transforming raw data into actionable insights through SQL, Python, Power BI, and Tableau. Passionate about solving business problems using data-driven approaches, statistical analysis, and machine learning. Comfortable working with cross-functional teams, communicating findings to non-technical stakeholders, and building analytical solutions that support strategic decision-making.

PROFESSIONAL EXPERIENCE

AI Data Annotator & Data Science Contributor - Scale AI

JAN 2024 - MAR 2026

- Collaborated on Data Science and Data Analytics projects by validating datasets, reviewing model outputs, and ensuring data quality for machine learning workflows.
- Worked on projects involving supervised learning algorithms, including Decision Trees, K-Nearest Neighbors (KNN), Principal Component Analysis (PCA), and other analytical techniques.
- Performed quality assurance and peer reviews, evaluating contributors' work and providing structured feedback to maintain project standards.
- Contributed to the coordination of a large-scale annotation project by supporting task organization and quality control processes.
- Participated in analytical projects involving business dashboards, data interpretation, and insight validation.
- Evaluated and corrected AI-generated Python code, focusing on tool usage, analytical workflows, and data-related tasks.
- Worked with Generative AI tools, REST APIs, and MCP servers to support AI-assisted data analysis workflows.

Co-Owner and Business Manager | Dos Torres Sport

JAN 2020 - PRESENT

- Managed daily business operations, including sales, inventory, supplier management, and marketing activities.
- Developed and implemented marketing strategies to increase brand awareness and customer engagement.
- Monitored business performance and supported decision-making through sales and operational analysis.

Freelance

JAN 2021 - JAN 2023

- Developed end-to-end analytical projects using SQL, Python, Tableau, and Power BI.
- Built interactive dashboards and business reports focused on actionable insights.
- Applied statistical analysis and machine learning techniques to solve real-world business problems.
